8. Our business is dependent on developing and maintaining continuing relationships with our clients and customers. The loss of any significant client or customer could have a material adverse effect on our business, financial condition and results of operations.

Generally, we do not enter into long-term supply contracts with any of our customers, our business is dependent on developing and maintaining a cordial and cooperative relationship with our major customers. In the event of a decline in the demand for our products or services by our leading clients, our business, results of operations and financial condition may be adversely affected. There can be no assurance that we will get the continuous orders from our valuable clients in future and able to maintain existing business level. In such event, our business, profit and revenue will be adversely affected.

9. Failure to protect our intellectual property could harm our ability to compete effectively.

Our market strength and reputation among our clients is dependent on our ability to protect our proprietary technology. We rely on copyright, patent and trademark laws, other contractual regulations to establish and maintain our proprietary rights. We intend to protect our intellectual property rights in a very strict manner. However, there can be no assurance that will be able to protect it successfully. Our clients are spread over India as well as overseas countries, our intellectual property rights have limited jurisdiction of India and it does not provide protection in the overseas countries, so we may have to get multiple jurisdiction protection of Intellectual Rights, which is very expensive and lengthy process. We have got our Logo “ TRIDHYA TECH”

registered with the Trade Marks and Patents Authority in INDIA, and now it has to be registered with client countries. We may be unable to detect the unauthorised use of, or take appropriate steps to enforce, our intellectual property rights in India or abroad. Failure to protect our intellectual property and trademarks could harm our reputation, business, profitability and affect our ability to compete adversely.

10. Any non-compliance of any of the provisions of Non-Disclosure agreement by the client as well as employees' effect on our reputation, business, financial condition and results of operations.

While recruiting employees in our organisation, we are getting non-disclosure agreement executed with the employees and we are also getting non-disclosure agreement with our client Company to protect our technical know-how and business secrets. The disclosure of certain information of our products to the competitors by our employees and certain details of our products, methodology and business terms by any of our client to other competitors may affect our business adversely. Though, we are taking utmost care to maintain secrecy in our business process, we are not sure that we shall be able to maintain complete secrecy. The disclosure of such information about us and our products could have an adverse effect on our business, resulting operations, financial condition and prospects.

11. We have to face severe competition in our business.

There is a severe global competition in software based product markets. We are also facing competition in technological upgradation in our products as it is extremely fast changing technologically. We expect competition to increase and intensify in the future as the pace of technological change and adaptation quickens and as more companies enter our markets. If, we are unable to introduce new competitive user-friendly products or services making our technology comparatively advanced, add new functionality to existing products and services, introduce cost effective products and after sales services, we may have to suffer loss of customer and market share of our products. Further, some of our competitors may possess greater resources than us, including greater revenues and financial and marketing resources, sizable offshore service, delivery capabilities, more experience with international operations or stronger brand recognition than us. We may require to incur sizable expenses for creating Brand value and international recognition. Any in our competitive position could result in lower revenues or profitability, which could adversely impact our ability to realise future revenue and profitability.

12. If we fail to response to changing customer needs and adopt and develop new technologies, our business, financial condition, and results of operations could be adversely affected.

Our main business is software development which need rapid technological innovation, technological upgradation to meet with the changing customer demands. We believe that the technological upgradation is continuous process in this fast changing world. Our future success depends on our ability to continue to innovate and increase customer adoption of our products and services in other areas. We need to continue to invest in upgradation of technologies and after sales services. If we are unable to keep up our self to match upgraded technology with these rapidly evolving customer requirements, or if new technologies emerge that are able to deliver competitive products at reasonable prices, more quickly, efficiently, more conveniently and more securely than our competitors, our business, financial condition, and results of operations will be adversely affected.

13. Our product and services exposed us to numerous risks, including sometimes conflicting legal and regulatory requirements, and violation of these regulations could adversely our business and results of operations.

Our customers are also spread over the various overseas countries. As we continue to expand our business operations internationally, we are subject to compliance of numerous laws and regulations in these countries. Our Company also received revenue from operations from sales outside of India. Different countries may have their own set of Rules and regulations and Acts, Non-compliance with any of these regulations in the conduct of our business could result in termination of client contracts, fines, penalties, criminal actions against us or our officers, disgorgement of profits, prohibitions on doing business and may have an adverse impact on our reputation. Any lapse in compliance with these regulations in connection with the performance of our obligations to our clients could also result in exposure to monetary damages, fines and/or criminal prosecution, unfavourable publicity, restrictions on our ability to process information and allegations by our clients that we have not performed our contractual obligations. Many clients also seek to regulate the actions in their own countries, due to the varying degree of development of the legal systems of the countries in which we operate, local laws might be insufficient

to defend us and preserve our rights. We could also be subject to risks to our reputation and regulatory action on account of any unethical acts by any of our employees, partners or other related individuals. In such cases, we have to appoint lawyers in the concerned countries to defend our case by paying very high fees and incurred huge expenses, which will affect our reputation, revenue and profitability adversely.

14. Undetected software design defects, errors or failures may result in loss of or delay in market acceptance of our product and services or in liabilities that could materially adversely affect our business, financial condition and results of operations.

We provide software development solutions which involves a high degree of technological complexity and have unique specifications which could contain design defects or software errors, such as errors in coding or configuration that are difficult to detect and correct. Though, our technical team take utmost care to prevent such error, but we cannot assure you that, despite testing by us and our customers, errors will not be found in new software product development solutions, which could result in litigation and other claims for damages against us and thus could materially adversely affect our business, financial condition and results of operations.

15. We availed the services of certain consultants for some of our operations. Any deficiency or interruption in their services could adversely affect our business operations and reputation.

We avail the services of outside consultants from time-to-time for development of our software products and after sales services. Our ability to control and supervise the manner in which services are provided by third party consultants is limited and we may be liable legally or suffer reputational damage on account of any deficiency in services on part of such consultants. Though, we have our own system to monitor and review the work of such consultants, we cannot assure you that we will be successful in continuing to receive uninterrupted and quality services from our third-party consultants. Any disruption or inefficiency in the services provided by our third-party consultants could interrupt our business operations and damage our reputation and loss of profit.

16. Data networks are vulnerable to attacks, unauthorized access and disruptions. Losses or liabilities that are incurred as a result of any of the foregoing could materially adversely affect our business, financial condition and results of operations.

Data networks are also vulnerable to attacks by the hackers, unauthorised access and disruptions. There are certain cases, where in a number of public networks, hackers have bypassed firewalls and misappropriated certain confidential information, including personally identifiable information. It is possible that, despite existing safeguards, an employee could misappropriate our customers' proprietary information or data, exposing us to a risk of loss or litigation and possible liability. Our computer networks may be vulnerable to unauthorised access, computer hackers, computer viruses, worms, malicious applications and other security problems caused by unauthorised access to, or improper use of systems by third parties or employees. Although we have not experienced any such attacks in the past other than instances of phishing, malware and virus attacks that we handled effectively. We cannot assure you that our present security systems can prevent any such attacks in the future or that we will be able to handle such attacks effectively. A hacker who circumvents security measures could misappropriate proprietary information, including personally identifiable information, or cause interruptions or malfunctions in our operations. Further, computer attacks or disruptions may jeopardise the security of information stored in and transmitted through our computer systems. Actual or perceived concerns that our systems may be vulnerable to such attacks or disruptions may deter our customers from using our solutions or services. As a result, we may be required to expend significant security resources to protect us against the threat of these security breaches or to alleviate problems caused by these breaches.

17. There is no monitoring agency appointed by Our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.

As per SEBI (ICDR) Regulations, 2022, as amended, appointment of monitoring agency is required only for Issue size above Rs. 100 cr. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of Listing Agreement. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the National Stock exchange of India Limited.

18. The Company has not filed the GST returns in due time and also delayed in payment of Provident Fund payments

There have been instances of delays of Filing GST Returns and EPF Payments. As per the provisions of the Goods and Service Tax, 2017 (GST), the company has to file the returns within prescribed time limit provided in the Act. However the Company in certain case have failed to file the Returns on Due Date but the same were filed after the lapse of few days with the Authority. As per the Act provisions of Employees Provident Fund Act, the company has to make the payment within prescribed time limit provided in the Act. The Company has failed to make payment of the Provident fund in certain cases on due date but the same were paid after lapse of few days with the Authority. The company has to pay bear the interest cost and penalty, if any, levied by the Authorities. The Company has not received any notices for lapses of both the Act.

19. Our failure to adapt to technological developments or industry trends could affect the performance and features of our products and services and reduce our attractiveness to our customers.

We are in the business of software technology, which is extremely fast changing and updating industry. As our operations will grow in scope and size, whether through offering of new services or expansion into new markets, we must continuously improve, upgrade, adapt and expand our systems and infrastructure to offer our customers enhanced services, features and functionality ahead of rapidly evolving customer demands, while maintaining the reliability and integrity of our systems and infrastructure in a cost-efficient and competitive manner. The systems, infrastructure and technologies we currently employ may become obsolete or be unable to support our increased size and scale in a very short span of time. Even if we are able to maintain, upgrade or replace our existing systems or innovate or customize and develop new technologies and systems, we may not be as quick or efficient as our competitors in upgrading or replacing their systems. We may be unable to spare enough financial resources or obtain sufficient financing on commercially acceptable terms in time, or at all, which may have a material adverse effect on our business, prospects, results of operation and financial condition. Our new systems, infrastructure and technologies may not perform satisfactorily, or be used effectively and we may also fail to match with our products and services to our increased size and scale, customer requirements or emerging trends and industry standards.

In addition, to effectively manage our growth, we will also need to continue to improve our operational, financial and management controls, and our reporting systems and procedures. Continued growth increases the challenges involved in, amongst others, continuous training and development of skilled and competent personnel and employees and developing and improving internal administrative infrastructure. These systems, enhancements and improvements will require significant capital expenditures and management resources. Failure to implement these improvements could adversely affect our ability to manage our growth. If we do not effectively manage our growth or appropriately expand and upgrade or downsize and scale back our systems and platforms, as the case may be, in a timely manner or at a reasonable cost, or both, or at all, we may lose market opportunities or damage our attractiveness and reputation with our customers, which may adversely affect our business, financial condition and results of operations.

20. Failure to offer client support in a timely and effective manner may adversely affect our relationships with our clients.

After sales services is the heart in our software industry. From time to time, our clients require our support teams to assist them in using our product and services effectively, help them in resolving post-deployment issues quickly and in providing ongoing support. If we are not able to sufficient resources or are otherwise unsuccessful in providing required assistance to our clients effectively in a timely manner or at all, it could adversely affect our ability to retain existing clients and could prevent prospective clients from adopting our product and services. We may be unable to respond quickly enough to accommodate short-term increases in demand for client support. We may not be able to modify the nature, scope and delivery of our client support to compete with changes in the support services provided by our competitors. Increased demand for client support, without corresponding revenue, could increase the costs and adversely affect our reputation, business, results of operations and financial condition. Any failure to maintain high-quality client support and after sale services, or a market perception that we do not maintain high-quality client support, could adversely affect our reputation, business, results of operations and financial condition.

21. Our success depends heavily upon our Promoters, Directors and Senior Key managerial personnel for their continuing services, strategic guidance and financial support.

Our success depends heavily upon the continuing services of Ramesh Marand and Vinay Danger who are the natural persons in control of our Company. They are the key persons and their s experience and vision had played a key role in obtaining our current reputation and status in the market. We also depend significantly on the

expertise, experience and continued efforts of our technical team; hence, our performance and success substantially depend on the ability to attract and retain our key employees, including our management team and experienced personnel. There can be no assurance that any member of our senior management or other experienced personnel will not leave us in the future. The lack of or loss of the services of such key persons in the organization could seriously impair our ability to continue to manage and expand our business. Our success also dependent on our continuous ability to select right person, hire, train retain and motivate them. There is a keen competition for personnel in our industry, and the scope of availability of suitable and qualified candidates in our industry is very limited. If we fail to hire and retain our qualified employees, the loss of their services could affect our business operations and financial condition and reputation adversely affected.

22. Our international sales and operations are subject to many uncertainties and we are exposed to foreign currency exchange rate fluctuations.

We are always subject to risks inherently associated with international operations, including risks associated with foreign currency exchange rate fluctuations, which may cause volatility in our reported income, and risks associated with the application and imposition of protective legislation and regulations relating to import or export or otherwise resulting from foreign policy or the variability of foreign economic conditions. Any fluctuations in foreign currency exchange rates may have direct impact on our profits, results of operations and cash flows and consequently on our business condition and profitability. We have not entered into any hedging arrangements to account for any adverse changes to the foreign currency exchange rate.

Our products development is a costly, complex and time-consuming process and we have to wait for a long period to realize the investment made in product development. Our major investment and focus is in product development and related product opportunities. Investments in new technology and processes are having always uncertain results. Commercial success depends on many factors, including the degree of innovation of the software products and services developed and effective distribution and marketing. Such expenditure may adversely affect our operating results if they are not offset by corresponding and timely revenue increases. We must continue to divert significant number of resources to our research and development department in order to maintain our competitive position in the market. Moreover, new software products and services may not be profitable, and even if they are profitable, operating margins for new software products and services may not be in line with the margins we have experienced for our existing or historical software products and services. If we terminate a product in development in which we have invested significant resources, our prospects may suffer, and will not provide any return on our investment. In turn, this may adversely impact our business, operating results and financial condition.

Illustration of the Book Building and Price Discovery Process:

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20.00 to ₹24.00 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Amount (₹)	Cumulative Quantity	Subscription
500	24.00	500	16.67 %
1000	23.00	1500	50.00 %
1500	22.00	3000	100.00 %
2000	21.00	5000	166.67 %
2500	20.00	7500	250.00 %

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

INTRODUCTION

The Indian Information Technology/ Software industry is a global powerhouse today, and its impact on India has been incomparable. It has contributed immensely in positioning the country as a preferred investment destination amongst global investors and creating huge job opportunities in India, as well as in the USA, Europe and other parts of the world. In the last decade, the industry has grown many folds in revenue terms, and relative share to India's GDP is around 7 and 8 percent in FY2021-22. India is the topmost off-shoring destination for IT companies across the world. Having proven its capabilities in delivering both on-shore and off-shore services to global clients, emerging technologies now offer an entire new gamut of opportunities for top IT firms in India. The country's cost competitiveness in providing IT services, which is approximately 3-4 times cheaper than the US, continues to be its Unique Selling Proposition (USP) in the global sourcing market. Indian IT/Software industry offers cost-effectiveness, great quality, high reliability, speedy deliveries and, above all, the use of state-of-the-art technologies globally.

The Indian IT/ ITeS industry has a leading position globally and has been progressively contributing to the growth of exports and creation of employment opportunities. Women employees account for 36% (1.8 million) share in total industry employee base.

The Ministry of Electronics and Information Technology is coordinating strategic activities, promoting skill development programmes, enhancing infrastructure capabilities and supporting R&D for India's leadership position in IT and IT-enabled Services.

IT/ Software Export

- **BPM:** At \$39 billion and a growth rate of 14 % y-o-y, this sector too is accelerating its shift to platform solutions (BPaaS to grow 4X vis-à-vis traditional BPM). Growth drivers include automation-led services in F&A and HR, increased adoption of RPA and analytics.
- **ER&D:** Led by increasing softwarization of equipment & devices ("software-led products") and cloudification, this segment is being driven by cloud engineering, services around data monetization and digital engineering. Historically, this segment has been recording the fastest growth rate; however, for FY2021, it is likely to see a drop-in growth rate (17% y-o-y) to touch \$36 billion.

- **Software products:** Rise in demand for collaborative applications, application platforms, security software, system & service management software, and content workflow & management applications will lead to a 34% growth of this segment to \$7 billion.

Illustration of the Book Building and Price Discovery Process:

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20.00 to ₹24.00 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Amount (₹)	Cumulative Quantity	Subscription
500	24.00	500	16.67 %
1000	23.00	1500	50.00 %
1500	22.00	3000	100.00 %
2000	21.00	5000	166.67 %
2500	20.00	7500	250.00 %

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, 1991 unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies are responsible for granting foreign investment approvals are the Reserve Bank of India (“**RBI**”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”).

The Government of India proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2017 will be valid until the DIPP issues an updated circular.
